It's a cross-platform software, developed by Adobe Systems that many photographers use to edit their images. It is also used to create graphics, logos and other images. Presently, Photo.com, SmugMug, Smugmug Pro and Flickr are Adobe Photoshop Elements online services. Over the years, the company has made many updates to the program to accommodate photo manipulators, hobbyists and real-life Photoshop users. In this post, we take a look at some of the main features of Photoshop Elements 12. This is a free downloadable version of Photoshop.

1. **Advanced Color Management** You can use the RGB color model with real-life printing materials and the CMYK model for most photo-printing processes. The hue-saturation-value, or HSV, model gives you better control over light values. You can change the color of textures, paint and patterns. In the previous version, Photo.com reported the following differences in Adobe Photoshop Elements for web and mobile: In Photoshop Elements 12, you can use the following options: Real-time edit (control the light values in your image) Localized control (adjust the intensity of the color in any part of your image) Localized control (adjust the intensity of the color in any part of your image) Grayscale (localize the black, gray, white, black and white colors in your image). Color shift (Take your photo and fix any color shifts or lighting variations) Dithering (paint the gray sections of your image with a pattern to make them look more natural) In the previous version, you couldn't make changes to a portion of the image You can add more than two samples and adjust them with sliders (RGB channels). You can also make changes to adjustment layers. Different adjustment layers can be edited simultaneously
2. **Edit Raw JPEGs** This allows you to replace the values of each pixel with the RGB values you see in the image, called Raw Edit. This version of Photoshop Elements is the first version to support RAW format. The new RAW format also uses jpeg files, which you can save when the image is processed, meaning the picture files are saved in two formats (jpg and raw).
3. **Touch Screen** You can use the touch screen for navigation and improve the performance by dragging the content directly on the

Q: Dealing with REST API issues in Symfony I'm creating a Symfony 4 application and I am currently dealing with a REST API I've created with an external vendor. I had to add some specific headers and the REST API code has issues with the whitespace in the headers. My REST API is defined by a lot of routes that have params (except headers) in the routing.yml file: bookingrestapi: resource: '@BookingRestBundle/Controller/RestApiController.php' type: annotation prefix: /rest/ defaults: _controller: 'AppBundle:RestApi:index' format: json I can't add the headers directly to the queryParams key because I need to set the headers when calling the api. Is there any way to tell Symfony to ignore the whitespace in the request headers? Here are the headers I need to send Accept : application/json Accept-Charset : utf-8, gzip;q=1.0,

Road Safety Deaths Cost State \$3 Billion The state of New York loses \$3 billion a year in productivity, according to the results of the latest annual report on road safety published by the Governors Highway Safety Association (GHSA). The report, entitled "New York State: The State of Vehicle-Pedestrian Fatalities," shows that the state is spending an estimated \$2.2 billion on a wide variety of programs addressing all aspects of a safe road environment. The report outlines New York State's program to address vehicle-pedestrian fatalities - a major public health problem in New York City - and shows that in 2003, more than 1,000 pedestrians were killed in crashes involving New York City streets. "The report shows that the fatal consequences of pedestrian deaths is not merely an issue for low-income neighborhoods with dilapidated housing," said New York Governor George Pataki, who serves as chair of the Governor's Highway Safety Association, in a statement. "These cities must join forces with their localities, states and the federal government to develop comprehensive plans for the greater good. The Governor also joined one of many rallies being held in Albany this week to call for an end to pedestrian deaths by year-end." The report also underscores the importance of tire technology as a safety feature - due to the fact that more than 1,000 pedestrians were killed on roads nationwide as a result of tire failure. "This new GHSA report highlights the need to increase awareness of the hazards that pedestrians face on streets. Although pedestrian fatalities can occur at almost any time of the day, certain activities at certain times of the day pose high risks and should be avoided," said Levar Hughes, GHSA executive director. "Individuals must exercise due care while traveling in crowded city streets and should be careful to heed warnings signs that caution road users to keep to the right."
