Figure 1. Example of the completed AutoCAD Drawings AutoCAD Architecture AutoCAD has been an industry leader since its introduction over three decades ago. Thousands of AutoCAD users around the world use AutoCAD software on day-to-day basis to prepare construction drawings, design computer aided design (CAD) models, design mechanical systems, and develop 3D and 2D drawings. Figure 2. Overview of AutoCAD Architecture AutoCAD Architecture is the core of the AutoCAD software. The core consists of the core drawing model, which is the building block of a drawing. Core also has application programming interfaces (APIs), a graphical user interface (GUI), and software components. AutoCAD Architecture also has toolbox, which can be divided into two parts, work areas and template draw areas. Figure 3. Interaction between different components of AutoCAD Architecture AutoCAD Work Areas AutoCAD Work Areas are user interface components for drawing and preparing various types of drawings. The toolbox contains six Work Areas. 1. Drafting Area – Design drawings, drawing models, and the workflow process of preparation of a new drawing. 2. Tables Area – Stores pre-existing data and is used to design 3D models. 3. Toolbar Area – Contains command buttons and drop-down menus. The size of the toolbar area is adjusted based on the window size. 4. Plot Area – Design a 2D plot and adjust it, and print the plot. 5. Object Area – Allows users to create and edit objects and its properties. 6. Drawing Area – Design models, prepare new drawing and print it. AutoCAD Templates AutoCAD templates are user interface components. They can contain various layers, which can be made visible or invisible by the user. Templates can be stored in the following two locations: 1. The Desktop – Templates stored in the desktop area can be opened from the Template Manager window. 2. Work Area – Templates stored in a work area can be opened from the Template Manager window. There are a total of five templates available in AutoCAD Architecture. These templates are available for both Autodesk AutoCAD and Autodesk AutoCAD LT. 1. Design Drawing Template The Design Drawing Template contains layer1, layer

Start the plugin with the command line : > acskeygen.exe -h For more details see this help. In the spirit of the Italian tradition of bike racing, the Giro Rosa, the queen of them all, is one of the last remaining road races that is a true test of stamina and grit and it's always a race for the young riders. Few know of the brutal finish in Matera, a city that sticks to the sheer mountains and bad weather of the mountains of Southern Italy. Over the years, this race has seen some of the greatest young riders in the world such as Nairo Quintana, Roman Kreuziger, Jens Voigt, Oscar Freire, Alexandr Kolobnev, Fabio Casartelli, Rui Costa, Alexander Vinokourov, Pavel Brutt and many others. Back in 2004, Ivan Basso won the Giro Rosa. It was an unforgettable experience and a great day for the Basso family. When Ivan was going to return to cycling in 2011, the Tour de France directors wanted him to go to the Tour, but Ivan had other plans. He wanted to try his luck in the Giro Rosa and maybe even win. He went to Matera with that goal in mind. In the beginning of the race, he was fourth, behind Vincenzo Nibali, Cadel Evans and Daniel Oss. With the help of some strange luck, he managed to climb up in the GC, despite the cold and wet weather and the treachery of the mountains. Then he climbed to the summit of the massif, the Garigliano, and he attacked his rivals. He was the first rider up the ascent, and he slipped away from his rivals. He managed to cross the line with the rainbow jersey, becoming the first Italian since Francesco Moser in 1976 to win the Giro Rosa. He went on to win the Tour de France and the Giro d'Italia in the same year and also in the following year. The great Ivan Basso lived through the most impressive experience of his career, but he had more to experience on a single day, and he did it with good friends. Since he has left us, and he is missed by everyone, the idea of riding the Giro Rosa again became a dream for many people. At the time he was cycling, many riders were with him, sharing his experiences and his passion for the mountains and the road
