CDAY Calendar Almanac Free Download

CDAY is a free, powerful application for Windows, Linux, and Unix. It works with any date format and has an extended API. It can provide your computer with a calendar of daily activities, schedule events and birthdays, and summarize other general events. There is a Web server component and a standalone application that also provides a calendar and an almanac. CDAY Calendar Almanac offers the following features: Generate, display, and write calendar files. Generate colorful calendars. Generate date-only calendars. Generate PDF, HTML, and XML calendars. Embed calendars in web pages. Generate HTML table of contents. Format dates in a number of ways. Calculate dates. Generate almanacs. Display events, birthdays, and reminders. Search calendar data. Generate color-coded events and birthdays. Make it easy to add and delete events. Provide automatic birthdays on most systems. Embed your own events in the calendar. Edit events with a graphical user interface. Share events with other people. Download the latest developments from the Web site. Record your own events. The output of CDAY Calendar Almanac can be redirected to a file or into a standard terminal. It can be piped to an external process, or to an e-mail message. It can generate colored HTML or plain text calendars. It can generate a calendar from your configuration file or a personal calendar file. It supports all formats supported by the strptime library. It can also generate tables of contents, and it can display or write the date in a number of formats. It can also generate a string in any supported format, such as XML. It can also generate a number of HTML layouts, including a graphical calendar. It can also generate a list of the birthdays in a date range. It can be used as a command-line or command-line only application. It is provided as an x86 and x86-64 version of an application suitable for most Windows and Linux systems. CDAY Calendar Almanac Features: The following features are available: Calendar Events and Birthdays Calendars are specified in a personal or system configuration file. It can be used as a command-line or command-line only application. Almanacs The generated events are represented graphically in the calendar, or in a color-coded format if you set some
