I want to write a query that does the following: Select from a table if there is a specific value in another table My database looks like this: Table 1 - Name - ID Table 2 - ID - Value So, what I want to do is select all the rows in table 1 if table 2 contains a specific value, but it can be in either row or column. So, lets say I have the following: Table 1 - Name - ID Table 2 - ID - Value I want to select all rows where the value for

table 2.Value matches '5', but the value may be in either row or column. So I want to get results like this: Table 1 - Name - ID Table 2 - ID - Value A: Please try this SELECT * FROM table1 where table2. f988f36e3a
