
Command Conquer Red Alert 3 1.12 Crack 75 ((EXCLUSIVE))

C&C Red Alert 3 LAN works fine, whether it's a real LAN or using Tunngle. Be sure to update your game ... I have two network cards, one is a local game, the other-Tunngle. When I use the local game, I can play it, but when I try to use Tunngle, the game gives an error. It says, game can't find IP, failed to connect. After much searching I found a solution. I found that the problem was that Tunngle couldn't connect to the network, and it was probably because I put a USB cable into the LAN port. I reversed the port order, and the game went great!
