counter strike is the best mod ever to the best game ever, half life. the game is just as good as it was when it was first released and has only gotten better since then. it is also still maintained by valve software who created the game and its predecessors. there are two types of games. first is the single player game. this can be played either with a person or in a server. with the single player game you can create your own custom game or play with other people online. it is like a co-op game. second is the multiplayer game. this allows up to 20 people to play on the same server. the multiplayer game can be played with a friend or by others online. normally, people will say that 1.6 is not as good as 1.3 or 1.4, but i disagree. in 1.6, i have found that the new weapons that are not in 1.3, such as the m14, are absolutely awesome. the balance changes in 1.6, and the fact that grenades are not always fatal, but instead damage the player, are also awesome.³ there is really no change at all to the gameplay. for the ones who want to try a new game, download this mod, create your own server, set up a team to play on, invite your friends, and play! counter strike is a first person game with a very nice and intuitive control system. the selection of weapons and how they work in the game is extremely well done. and if you ever have a problem with the items in the game, the developer of the mod has included a couple of options that you can use to help you with your items. do not worry, these options are very easy to use. there is a very nice feature that allows you to send and receive requests with other players. if you are playing a game with someone else you can request them to join your game. while they are in the game, they can send you requests to join their game. this is a very nice feature, because the game being a team-based game, sometimes you can really miss out on a game if there is just you on the server. if you and your friend have a server. you can join the server of your friend even if you do not have a personal server.

counter strike is one of the most successful pc games in history. it set in the golden age (a year in american history that began on october 15, 1955). in counter strike, you play the role of a counter strike terrorist. when you have to fight, you will be fighting against all of your enemy counter strike terrorist. counter-strike was a modification (mod) to the half-life game. it modifies the multiplayer aspects of half-life to bring to it a more team-oriented gameplay. counter-strike provides the player with an experience that a trained counter-terrorist unit or terrorist unit experiences. the mod is team-based featuring one team playing the role of the terrorist and the other team playing the role of the counter-terrorist. each side has access to different guns and equipment, as well as different abilities. maps have different goals such as: hostage rescue, assassination, bomb defusion, terrorist escape, etc. weapons include the usual assortment of pistols, shotguns, assault rifles, sniper rifles, grenades, demolition devices. each side has access to a different subset of weapons so for example only the counter-terrorist can use the m4a1, and only the terrorists can use the ak-47. we are confident that we've created a mod quite unlike any other.
