Keygen .The invention
relates to a device for
converting a polygon with
an even number of sides
into an equilateral triangle,
whereby the sides are
varied such that the
triangle is dynamically

transformed into an equilateral triangle or vice versa, depending on the status of the device.

Devices are known which are used for converting a polygon with an even number of sides into an equilateral triangle. Such devices for converting a polygon into an equilateral triangle, for example, are known as “magic squares” or “card-defying squares” and are used for games. For example, U.S. Pat. No.

4,128,693 relates to a device for converting a polygon into an equilateral triangle. It is the objective of the present invention to provide a device for the conversion of a polygon with an even number of sides, whereby the sides are varied depending on the status of the device such that the triangle becomes equilateral for one status, and dynamically transforms into a different polygon

for another status. This objective is achieved through a device for converting a polygon with an even number of sides, the sides being
