All eight locomotion schemes are created using the isometric blocky graphics format that is better known as Volatile Vertex, which is ITRP's in-house engine and something that has already been featured in many of the company's other titles. Vertex allows us to create 16 unique locomotion schemes to get the player from place to place and to maintain a level of variation in gameplay. Low-Fat and Reduced-Carb (LFR) is a unique experience that follows the character of an obese fisherman who lost his beloved daughter in a tragic accident. No story to date, this character-driven narrative gameplay title is supported by some fantastic visuals as well as the audio-visual experience. Gameplay:In the game, the player must assume the role of the deceased fisherman, guiding his own character through the game. The character is a parody of a power-crazed protagonist, including a newly acquired gun, his own private reality TV show, a live-in nurse, the ability to purchase anything he desires with his own money, and even a bottomless pool of vodka. He will, however, have to learn to manage the negative effects of his character's self-destructive lifestyle to allow him to achieve the goal of bringing his daughter back home. 7-10 hour story. **What's new:**

) While the goose may have been the source of the title for the album, Buffalo Tom's album itself marks a significant cultural progression for the band. Before fusing folk, jazz, and rock alongside pop, they were a progressive folk band. This time around, the band pulled from other genres in more aggressive forms. The album sees Buffalo Tom branching off into instrumental numbers like "Combination Lunch" and "Sit on Their Hats," which feature a near guitar solo. The most serious single on the album is "Over the Sea to Philadelphia." It's a slow, dark, and mournful song that pulls no punches. The band has previously been uncomfortable with taking serious musical matters such as politics or wars, but the stormish sampling on "Over the Sea to Philadelphia," as well as its defiantly emo title, finds the band truly throwing their band's heft, commitment, and love down in song. So without more ado, here is Buffalo Tom's "Over the Sea to Philadelphia." Please note: we have been online over ten years, and we want TrekToday to continue as a free site. DATWING: Starfleet News: No current reports from Starfleet have any reports of damage to equipment or consoles as the web site was brought back up last night. "Yoda" will provide an update prior to the Saturday update. TrekNews Update: We had a banner message on STvRB saying that the SPACE.com Blog had a story about a Klingon boat that had been named the "Klingon Keep Moving." That is the ship Robert Duncan Mackenzie was travelling on, but it's not a Klingon Keep Moving. It's the supremely named C-U-K-T, short for the Klingon cruiser U.S.S. C-U-K-T. Since Robert Duncan Mackenzie has no obligation to take accurate news and facts to his fans, I have filed a request with him to have his yacht named for the C-U-K-T, and not the Klingon Keep Moving. I believe he will reply to my letter
