Interested in Game Design? Abscess formation following hematopoietic stem cell transplantation: risk factors and epidemiologic characteristics. There have been no previous data on the risk of abscess formation among hematopoietic stem cell transplantation (HSCT) patients. A retrospective analysis was conducted of all HSCT patients hospitalized with abscess formation at the Cancer Institute Hospital between 1990 and 2003. The percentage of patients affected was compared with that of the general population and among particular patient populations. Abscess
