## **CLASSES**

Each class has its own unique attributes. **ATHLETES** The Athlete provides a means to explore the vast geography, gather resources, or launch attacks. When faced with a key opportunity or a brawny opponent, all you need is this class. The Athlete always has high defense and attack power and as a result they can utilize powerful attacks right away. The Athlete adapts their attack power easily. **WARRIOR** The Warrior, as his name indicates, is a class that is skilled in combat. He also has good defense. The Warrior is more capable of attacking swiftly than the Athlete. This class is great for thorough traveling and area exploration. Combined with the skills of the Mage, which he tends to like, he can work as a party member.

**MAGE** The Mage is capable of using magicks while traveling and exploring. Magicks are a diverse array of

abilities that range from creating boxes, which are used to teleport your party, to making impassable walls come down. By using magicks, the Mage is a class who can utilize a range

They tell you not to knock on wood, so I'm going to start by apologizing. Elden Ring Cracked Version is a fantasy action RPG (anime styled) game developed by Warp Zoned and online developers. I spent a short amount of time playing it before a certain ShinyRei reviewed it for us. I'm not going to go into all the details he's covered, but overall it's an interesting game. It's heavy enough to satisfy heavy RPG fans wanting a very story driven game. The action is animated well enough, though I would have liked to have seen some rough art. Perhaps my biggest complaint is that this game has the potential to be something great, but it's currently a technical mess. The combat is woefully unresponsive, especially with more than one party member, and the game's dark art style can really hurt a 1080p screen. The controls are clunky and the camera is wonky. I was really excited to try this game, but ended up playing it for about fifteen minutes and just couldn't bring myself to spend any more time with it. If that isn't a massive disservice to a game, then I don't know what is. The story seems interesting, though I wish I understood more about it. I'm going to stop talking about it because I don't want to spoil it. There are a lot of problems with this game. The presentation is sloppy, the localization is spotty, the gameplay is a mess of poor decisions, the gameplay is broken, there are glitches, and it's not smooth. Most of these issues are also found in the English Steam version. I know, I know. I might be being a bit harsh on the localization, which is in Japanese only. I definitely recommend checking out the Japanese Steam page for the game. Warp Zoned is listed there, and they also carry a number of their other games. The Japanese Steam store also has a number of other games by Warp Zoned, so perhaps you'll be able to learn more about the developer. They have a lot bff6bb2d33

Related Articles Concerned about the safety of the next generation? You've probably noticed the rash of recent videos, such as the dog bumping his head and the baby getting kicked by a young child, that have been posted on the internet. If you're concerned about your kid, it's time to get serious and get them in a go kart before it's too late. There's no guarantee you'll always be able to prevent accidents, but a little precaution never hurts. Why Go Karting? Children may be smaller than adults but have the same speed and physical limits, so there are still the same safety risks when they're having fun. So, when you're choosing a go-kart track or offering kids lap rides at your business you're responsible for ensuring their safety. Kids may not have the awareness necessary to prevent injuries in a minor crash, so they won't be able to control their speed and may accelerate and brake in a way that's unsafe for them. Getting their confidence up on the go-kart track will also give them a sense of empowerment and a fun hobby to keep them busy. That being said, the more skilled and confident children are, the better - they're less likely to cause harm to themselves or to others. This could save you a lot of heartache in the future. A Safe Go-Kart Track or Mini Bus? Safety-conscious parents may be surprised to discover the number of go-kart tracks that are home-based. Though many parents find it appealing, they have the same safety concerns. Any go-kart track you consider should

However, what is also apparent from the summary judgment record is that the majority of the incidents which Rutland complains of occurred after his first day of employment at JPAC and after Rutland was placed on indefinite sick leave. Therefore, this Court finds that Rutland's complaints regarding the above incidents do not create a genuine issue of material fact. ¶26. What is problematic for Rutland is the fact that the above-referenced incidents and conduct took place in a 24-month period and there was no indication as to how Rutland's performance fell over this time period. There was no evidence indicating that Rutland's 8 performance deteriorated after the events referenced in his deposition, especially after the Rutland's employment at JPAC began to change for the better. In fact, the evidence indicates that Rutland's performance evaluations were not negative during the 24-month period. It is only when the facts are viewed in the light most favorable to Rutland that the alleged negative conduct could be deemed to be retaliatory. Therefore, without a more developed record, counsel for Rutland has not proven that there is a genuine issue of material fact that Rutland's job performance in 1998 was adversely affected by the alleged adverse actions taken by Lieutenant Griffin and Lieutenant Forehand. ¶27. There are still other serious problems with Rutland's retaliation claim. Without more evidence about the
