The pitch shrinks; your ball paths shrink; and players and obstacles also shrink. Players no longer need to be perfect wingers or left-backs. They can be center-forwards and play as wing-backs. Players and objects on the pitch no longer have a specific size and shape — where can they go? How hard can they hit the ball? How fast can they run? You will feel the speed in your gameplay. Every matchday journey into the stadium feels like the real thing, but also the most authentic way possible. Now you will feel your body moving with the ball. You will feel the heat of the sun on your skin, smell the smells of the crowd and hear the sounds of the public singing the national anthem. In addition, FIFA 22 introduces a brand-new Skill Gameplay. The Skill Game is a suite of interactive cards that affect both your opponent and your team when you score, assist, or take a shot. In addition, new gameplay features such as touchline sprinting and a World Class Attack panel, will help you change the odds. Additionally, the all-new English Premier League and English Football League are back, with most of the leagues and stadiums being recreated in stunning detail. In other football leagues and countries, such as Germany, Spain, Italy, Turkey, Japan, and more, the FIFA community has grown exponentially.
