FIFA is a franchise that has redefined simulation football gaming for the past 25 years. FIFA is the best-selling franchise in video game history, and the original football game was released in 1991. FIFA 22 gets the ball rolling on a new era of innovation with fundamental gameplay advances and a new season of innovation across every mode. Based on cutting-edge animation technology, Visceral's FIFA delivers players with authentic control of players' movements and an immersive, intuitive control system that improves the authenticity of how players can move on and off the ball. FIFA's new Move Kit also makes it easier than ever to control defensive structure and players' ability to intercept passes. FIFA players have never had more tools to dominate matches with. Enriched by a year of gameplay innovations, FIFA delivers the deepest and most complete football experience of any game. FIFA 22 also introduces more connectivity and agent play, widening the world of possible game outcomes even further. FIFA 22 introduces two new modes: Pro Clubs and Career Mode. Pro Clubs lets players create and manage their own team, becoming the head coach, and then take them to the UEFA Champions League or UEFA Europa League. Career Mode lets players progress through the ranks of six licensed European leagues, starting as a promising young player and culminating with an 18th century-era victory parade. New Gameplay FIFA 22 breaks the mold with new fundamental gameplay advances. The control system is more responsive and intuitive, resulting in more accurate and realistic touch sensations, and improved camera control. The motion tracking now provides more intelligence to predict how players will move, reacting to body orientation and how players are moving. This lets players impact the game with more goal scoring opportunities than ever. FIFA 22 advances the chemistry of gameplay with enhanced ball control, tackling and passes. Players can now perform perfect and timed passes on an upfield run, and instead of being forced to perform an awkward shoulder-shuffle pass to a teammate, make a pass with the controller, letting the receiver make an instinctive and more accurate pass to a teammate. The Tactical Defending control system has also been enhanced. Players now have the ability to control defensive structure by instructing players to switch positions as a unit, as well as through button commands. FIFA 22 enhances gameplay speed and offers more player-impact decisions by adding contextual information. Now when players receive a pass, they can use this information to know whether to tackle, pass to a teammate, evade bc9d6d6daa
