You are the Knight protector of a small valley in the Dark Ages. You are far from home and expect a long and difficult journey ahead of you. As your troop gets ready to leave, a little girl approaches and begs to go with you. The fastest way to get home is to protect the girl and bring her to the Governor. Unfortunately, the road ahead of you is not safe, and you are warned of fierce robber gangs, bandits, and dragons. But what could be worse than bandits and dragons? About This Game The simplicity of using movement and combat, coupled with the turn based nature of the game, makes it very accessible and enjoyable to play. About This Game Playable characters - Infantry, Cavalry, and artillery units are all represented. Characters have strength (mana) and range. Infantry units occupy spaces on the map and become friendly to surrounding units as they stay within a range. When you pick up a unit from a friendly unit, or a spot in the forest, you move it to your own movement grid.

You can move a unit a maximum of the range it has, then double its strength to move twice the distance. The range of a unit is its farthest away a friendly unit of the same type can be, and the strength to distance is double the distance from one unit to the other. Monsters - Knights can attack minions, which decreases their will and stealth, and gain them experience, gold, and a bonus if they scored a critical hit. Units with melee damage other than the knight can also attack other units and minions. Gold - This is earned by looting, killing or capturing monsters, enemy units, or being awarded for completing actions such as winning a siege or being the first to attack. Willpower - Powerups such as fire, dragons, and healing can be used to temporarily increase or decrease the will for a unit. Villages - Players must build settlements and fortifications to heal and sustain their soldiers and grow their empire. Villages are a key location for building and defending from attacks.

Tactics - This game allows you to easily set up a complex tactical situation by assigning units to different colored squares on the tactical map, and then either attacking with a unit or moving a unit to a new colored square, thereby using some of their power and range to move around the map. "Quite a fun and well made game, for fans of turn based strategy." 8/10 - PlayingIndies "When I first came
