**Intouch 9.5 Wwsuite Lic.33 |VERIFIED|**

After installing Wonderware InTouch 10.6, configure your antivirus software to prevent archive files from being scanned. Also, antivirus software should not scan files in the following ArcestrA folders for 32-bit operating systems: C:\Program Files\ArcestrA C:\Program Files\Common files\ArcestrA C:\Program Files\FactorySuite (The FactorySuite directory may not exist in newer installations) C:\Program Files\Wonderware C:\InSQLData C:\Documents and Settings\All Users\Application Data\ArcestrA C:\HistorianData For 64-bit operating systems, the exclusion must reflect the (x86) program files directory instead: C:\Program Files (x86)\ArcestrA C:\Program Files (x86)\Common files\ArcestrA C:\Program Files (x86)\FactorySuite (The FactorySuite directory may not exist in newer installations) C:\Program Files (x86)\Wonderware

From Application Server Platform objects: Wonderware enforces the use of its products with a software license. After you install a Wonderware product, you must install a single license file, ARCESTR.A.LIC, which contains your customer information, product data, and software features. Until you apply your Wonderware license, you can run the InTouch HMI only in demonstration mode. After InTouch is installed, you can launch the Explorer (Windows or Macintosh) to begin to experiment with the system.

Launch the Explorer with the purpose of creating a new database (Window|File|New|database). InTouch has three different interface modes: Windows (Win), Mac and Linux. The Win mode is also called the Win32 format. Windows does not have an icon. The Mac icon is in the InTouch icon pack, which you can download from the web. In this mode, InTouch has a Mac OS X (OSX) style shell.
