Key Features Join (Merge, Combine) Multiple MP4 Files Into One supports a number of different file formats, including MP4, MOV,

---

FLV, and more. It allows you to merge and join multiple MP4 files at once, either from the same computer or network. The program supports both MP4 files and folders full of MP4 files. It allows you to join or merge a maximum of 40 MP4 files into a single MP4 file. You can synchronize video and audio of one MP4 file with audio and video of another MP4 file. After merging MP4 files, you can adjust the effect of the merged MP4 file according to your preference. Join (Merge, Combine) Multiple MP4 Files Into One

Downloads: 1. Download Mirror List In the file converting process, an application is mainly working with a variety of files so as to ensure that they meet the conversion requirements and are complete. In addition, you have the ability to convert any audio or image files. It can be your successful processing to create

---

video, audio or images with excellent quality. You can also use the built-in editor to edit the video with the help of various advanced functions. You can also view and share the converted file. Using the background conversion, you can rapidly manage all the related data. Join (Merge, Combine) Multiple MP4 Files Into One FAQ: Q: Does Join (Merge, Combine) Multiple MP4 Files Into One have a free trial version? A: Yes, it does. You can try the program totally free for 60 days. If you don't like it, you can quickly and easily cancel the trial version. Or you can choose to purchase the join multiple MP4

**What's New In Join (Merge, Combine) Multiple MP4 Files Into One?**

It has a pretty self-explanatory name, so it's hard to be surprised after installing it for the

---

first time. Join (Merge, Combine) Multiple MP4 Files Into One is an application developed to help users who want to quickly merge two or several MP4 files. Especially designed with a single goal in mind, this program doesn't attempt to impress users with a huge number of options. Instead, it offers them just the basics of MP4 file merging, so the whole process is very likely to be finalized in a matter of minutes. Once launched, you shall meet an interface that's plain and simple, which seems just about right given the overall number of options. Simply select the MP4 files to be processed, move them up or down in the file queue and hit the "Start" button to merge them all and create just a single MP4 file. There are no other configuration options, which of course can be very frustrating for more experienced

---

users, but instead Join (Merge, Combine) Multiple MP4 Files Into One can work with as many files as you want, the processing speed remains the same in all cases. There's one tool however that could come in very handy, as it gives you the option to add all MP4 files in a folder, so file selection is much easier. The main requirement is of course to place all MP4 files in the same folder, which in some cases isn't possible. Join (Merge, Combine) Multiple MP4 Files Into One however works fast and gets along very well with all Windows versions, without asking for administrator privileges to serve its purpose. As a conclusion, it's a good piece of software if you don't expect more than the very basic MP4 merging options. The good thing is that it works fast and doesn't hamper system performance in any way. "Join (Merge,

---

Combine) Multiple MP4 Files Into One" is a good piece of software that merges multiple files (MP4, MPEG-1, MPEG-2, AVI, WMV, FLV, MOV, ASF, FLX, MP3, OGG, WMA, AAC, AC3, QT, and PSP) into a single MP4 file (video or audio), which would then be playable on various media devices like smart phones, cell phones and any other device that plays multimedia files. Join (Merge, Combine) Multiple MP4 Files Into One has been designed to
