Category:MetaTrader Category:ECN trading platforms Category:Trade-related software for WindowsThe clinical outcome of a systematic outcome study of patients with proctitis caused by radiation injury. This study was undertaken to assess the value of radiography for the early detection of radiation injury to the rectum and to assess the clinical outcome of patients in whom early radiation injury was diagnosed. A total of 116 patients with proctitis caused by radiation injury were identified between 1989 and 1993. Patients were classified into three groups based on their radiographic findings: (i) acute, (ii) subacute, and (iii) chronic. In the acute group (n = 37),
