I have had a spacebar keyboard for a long time now, and can type pretty fast. I did not notice the problem until I began to type on other keyboards. In the end, the issue is my inability to use keyboards for extended periods of time. Because it is difficult for me to operate keys without looking at them, it is no wonder that I lose time in typing. There is not a single keyboard that can fix my problem. This is the reason why I designed a specialized unit that is able to present keyboard positions right in front of the eyes. With the help of a compact device with a high resolution, this unit allows you to easily see all the letters in a keyboard and then type them all at once. I believe that a specialized unit will be able to replace the laptop for any computing operations. And since there is nothing like a laptop with a keyboard, this specialized unit is of utmost importance.

How often do you think of how much of a nuisance bad typing habits can be? For some, it may be very hard to see how much effort it costs to type each letter. And for others, it may seem that typing is so simple that it does not require any special training. However, the truth is that typing errors are a common mistake and they can bring a lot of trouble to you. If you are a careless person and rely on software rather
