Just as with Lightroom 5, most of the improvements to Lightroom 6 have been to the application's workflow. Lightroom 6 offers one-step exporting from Lightroom to Photoshop so you can quickly export your photos. This hybrid approach means that you've got to work out which editing style suits your photos the best. But you won't know which will work until you start tinkering the shapes in Photoshop. In the new Lightroom 6 editor, you have an advantage over the previous version, and that's the ability to use an unlimited number of shapes for any editing in the app. You can make unlimited adjustments to all shapes--you get all that in the new 5.8). Called "Live Facial Boning" in the Accessibility section, the new facial warping filter can fix any deformity in photos, like a cataract or a sticking-out ear. It works by analyzing the faces and warps the whole photo in real time as you apply a filter. If you find yourself using Live Facial Boning often, check out the Adobe Photoshop Creative Cloud to help fund the development of this filter. In the meantime, Lightroom 5 is a reliable stock-trading app but for the few things it can't do well (such as batch processing), or when you need to use a competitor's software. As long as you are ready for some tedious fiddling in a second app, you can call up specific camera and editing designations and do most of your work to your heart's content. I've been using Photoshop since version 2, and while it's been a mainstay of desktop photography since its early versions, the product has evolved a bit over the years in terms of styles and processing power. I'm using Version 16.1, and I'm not too surprised at the evolving looks, although I do have a few qualms. One of the weaker points of the product—which is common for many digital editing software packages—is the pivoting window. This can be frustrating for many users, since it's a hurdle to the flexible exploration of layer and tools. I like the fact that the interface is quite customizable, but the default settings are good as well.
