bind a variable to the @inject
annotation Angular4? For class
members I use @inject for
injection in Angular2 from
component, but how to do this on
variables? We are developing in
Angular4. A: From what I have
seen, this is not possible to do

right now in angular 4, you can check the angular documentation here About another approach, I have seen some users generate the object that they are injecting with a factory, but this will probably depend on the use cases, but you have more info here # frozen_string_literal: true module Sources class Observer Conjunction vodacryocystorhinostomy with a microcatheter technique 1cb139a0ed
