Elden Ring XE-CURRENT [PC] • This is the PC version of the release version of the game. It is a bundled game, and has not been given a separate update. Although some of the interface may differ slightly between the PC and PSP version, there are no major differences from the previous version. • See the new features below for more information. • Game contents do not include the advertisements (approximately 10 minutes in total) shown in the PSP version. The advertisements are excluded from the original version because they did not fit the objectiveness of the game. • Although the game uses a file manager, it does not include a save function. To be able to continue play after saving, save data must be stored on a storage card. • The game screen is in an aspect ratio of 16:9. There is no difference in the screen size compared to the PSP version. • CPU: If you use a Pentium 4 processor with a clock of 3.00GHz or higher, you can play at a maximum resolution of 1280 x 720, and 60 frames per second. • Graphics: To take full advantage of this graphics capability, the total amount of video data must be set to the maximum. Resolution can be set to a maximum
