Generate 360 photos, videos and still images with the RICOH THETA S 360 camera. All captured images are automatically processed for a spherical viewing perspective in an intuitive, user-friendly manner. Turn digital photos and videos into a panoramic photograph or a rotatable floor plan in minutes with the RICOH THETA m15 360 camera. Enjoy panoramic photos and videos on your PC or phone. Upgrading your RICOH THETA S firmware is now easier than ever! Reduce the File Size of Your RICOH THETA S 360 Camera Photos and Videos With RICOH THETA To view 360 content on a computer, the RICOH THETA S 360 camera needs to be connected to the device you use for storage and viewing. After you import the data, it will be displayed in panoramic image format. To achieve this, the RICOH THETA S 360 camera needs to be connected to your PC via USB. The file size of the content displayed in RICOH THETA S is smaller than in other solutions. In the Picture menu you can find the option "File", which can help you reduce the file size of your captured images. To do so, you need to select and remove all unnecessary frames. For example: "Set as TIFF(9,8) RGB 24-bit (R G B) L" Filters Using filters, you can enrich your RICOH THETA S 360 camera photos with various artistic effects. In Picture > Filters you can find a selection of preconfigured filters. Alternatively, you can create your own to intensify the visual experience. Do so by choosing the RICOH THETA S 360 camera as the content source, selecting a filter and clicking Apply. Using the camera's built-in Wi-Fi function, you can connect your RICOH THETA S 360 camera to your router. Do so by following these instructions and you will be able to view your 360 content directly on your Wi-Fi router.
