Welcome to the punk wars of tomorrow where war lords will wage for fame and fortune! We call them punks. They think themselves invincible and spend their money on expensive weapons. But, even with their high tech weaponry, punks are still a bunch of little kids who cannot even get along. Soon, they will face off in a clash of their lives. 1. First, the game will be released in the "real-time strategy" genre. This means players will get a random map, randomly generated units, random building and production. 2. Then a one-on-one mode will be added. This mode would be played between two players, and the result of both players' battle in this mode will be the winner of the game. 3. Next, a three-versus-three mode will be added. This mode will be played between three players. The outcome of each battle will be decided by the highest number of attack points, or the highest damage, or the longest lifetime. (Overkill mode) Play Mode Random map: Each map has its own layout, so players will enjoy every fight by randomly generating a map. Also, the game will use a "block generation" mechanism. The players can prepare for war before they attack their enemies. Local Multiplayer: If there are two players in the same room, they will be able to fight against each other in a one-on-one mode. About The Team: Sikhyun is a player of the real-time strategy game.
