Here is my code and I have set the input value as 0 so it is not checked by default. but the checkbox value is checked by default and I want to set the value to the value of the hidden input element. for example if I input 1 into the input element and the hidden input element has the value 0 so I want to set the

checkbox to checked and when I go back to the site the checkbox is set to unchecked and the hidden input element has a value of 1. Any ideas? I hope you understand my question. A: Set value of hidden field before checking of the checkbox `var x = document.getElementById('x').value; if (x==0) { document.getElementById('x').value = 1; }` Here is the jsfiddle link - TP53 is a pivotal protein in tumorigenesis that is inactivated in more than 50% of cancers. The p53 family includes p63 and p73, two homologous proteins that exhibit overlapping but distinct functions. We
