Make sure to include a link to the video.Q: Hive doesn't work with wildcard for path with spaces I have the following input

path: /opt/hive/warehouse/inventory/employees/11/19/2019/1909221758/2019-09-22T17:58:58Z/employee? When

I run hive command I get error: FAILED:

SemanticException 'Column is not a constant: '19' however if I comment out the employee? part, I am able to run the query. Is there any workaround for this? A:

Found the workaround. I added quotes around the column name. When I run query on the 3rd element, the solution should not be needed, however when running the query on the end of the path, I end up with employee part only. If the fix is not applicable in your case, then it will be nice to see the error thrown so it can be fixed. 1 0 6 8 8 3 0 1 a c o m p o s i t e n u m b e r ? T r u e I s 3 5 5 6 3 2 7 9 9 p r i m e ?
