

Sharepoint2013serverproductkeytorrent

I'm trying to install a 180 day trial for SharePoint Server 2013, but when it asks for a product key, the key is listed below. I already installed SharePoint 2010 and used this key, so when I check the key on "http://www.microsoft.com/en-us/access" site and click "Get a new product key" it says I have a valid product key. And when I try to install it I get a message that says SharePoint Server 2013 requires a 64-bit OS and a 64-bit SharePoint client. I also tried to install using Windows PowerShell, but I get an error dd2bc28256
