Installation Steps:

1. Unzip

the downloaded and unregistered file. (Note: If you want to use the premium extension, you have to register it) 2. Then open SimLab HTML Exporter for Inventor and run. 3. The plugin will create the export ribbon. 4. Click 'Create export' and SimLab HTML Exporter for Inventor will create and open the selected html or edit it and save it. Sim Lab HTML Exporter is a lab

management and tutorial solution. After purchasing, you will get a license key which allows you to use all functionality of the software. You may easily download SimLab HTML Exporter and unzip the file anywhere you want on your local disk. SimLab HTML Exporter allows you to export all your lab content (models, segments, videos, animations, etc.) in HTML format

What's New in the SimLab HTML Exporter For Inventor?

Overview The SimLab HTML Exporter for Inventor is a handy and reliable plugin that provides you with a simple way of exporting your 3D models, projects, sessions and assemblies to HTML format. After the installation process is finished, the plugin will create a new ribbon menu, which can be accessed from the Tools tab of

Inventor. This way, you can quickly export your work by simply hitting the 'Export to HTML' button. Exporting the Project and Session views will produce HTML files that you can edit on your computer, and these files can be opened in any browser. If you need to edit these HTML files on a website, this feature is really handy. What's new in 1.0 version? SimLab HTML Exporter for Inventor 1.0

provides the following:

Inventor 2010 and later -

The plugin will work with all Inventor 2010 versions.

HTML Exporter now supports standard Inventor pages, such as Design Tools, Object Browser and the Content Browser.

Existing projects will be automatically reloaded when changed by the plugin. Export of the.inp file format is now supported.

Export of the.webml file

format is now supported.

File format support: HTML Exporter for Inventor supports all latest Inventor file formats, with the exception of.inp and.q3d file formats. Since these file formats are obsolete, you don't need to take care about these file formats.

Some websites automatically block or prompt you to download files, so that you can't view their contents. By using

SimLab HTML Exporter for Inventor, you don't have to waste your time dealing with these restrictions. If one of the automatically blocked files is a product (.ipk) or a session (.ipr), the plugin will export it as a site file (.webin) for you, so that you can easily open it in your browser. The export format you want to choose You can export your projects and sessions to HTML, Adobe Flash, Apple

iWeb or Macromedia Dreamweaver, and you can choose a particular file format or your personal one. To export your projects and sessions to HTML, you just need to choose the 'HTML Exporter' export format from the 'File' menu. Export to Adobe Flash: Export to iWeb: Export to Macromedia Dreamweaver:
