The legendary kingdom of Ivalice has been torn apart by war. The Kingdom of Ivalice is scattered across the continent, ruled by rival monarchs and their armies. The great nation of Valo and the independent provinces of Aterysia are constantly at war. Even the holy city of Skyloft is the scene of a civil war waged by fanatical religious sects. And the remnants of Ivalice have been invaded by Daemonkin, demonic forces who consume and corrupt the soul of the land. The old ways are lost, the power struggles are mortal. But a shocking discovery reveals a possibility of hope. In the ashes of victory lie a lost people, a forgotten land, and a path to the future of Ivalice. Enter the world of Ivalice - a world which is ever in turmoil, constantly at war, yet blessed with great magical powers. On the one hand you have the forces of Aterysia - the ancient empire of the former Kingdom of Ivaldi - and Valo, the culturally advanced

Examine a world of magic and monsters. Discover the sinister story of Ivalice, and help to shape its destiny. The best 5 By Testtestest I liked the story, the combat is fun and you can even customize your characters pretty much, the customization gives you the choice to make your character stats like a warrior, sorcerer, pirate, or any kind of specialized like a tank, healer, turret, etc, in addition the game features leaderboards and clans, the game is well made but its young so some bugs, but the game is really great for just a fun rp but not a full rp

THE BEST 5 By bhoogie I'm just being honest, the combat in Age of re-forging is actually brilliant, and like 5/5 stars, I have to agree with the others who are looking for rp. It's as if the old Rp veterans are almost like a godsend in the world of today's rp, and i'm glad they came back, despite some problems of bias like out of the box mini/voice acting (since the ratings page is very big/popular, lot of people contribute to that), i'm

Marle: The Labyrinth of the Black Sea is a 2013 American-British CGI science fiction adventure comedy film and the first feature film directed by Peter Jackson. Based on the graphic novel Marle by Shaun Tan, it tells the story of a Japanese boy and his friend as they venture through the ancient ruins of an underwater cave-city in the salt water Sea of Japan. The pair find themselves trapped after falling into the city's walls. Plot In 1910, Toya is a young boy living with his family on the coast of Japan. Toya likes drawing and puzzles, but his mother is concerned that he spends too much time playing. While on a school field trip, a photo of a mysterious white blob, which looks like a lotus flower, is taken. When Toya opens the photo, he finds his mother and friends captured inside the collapsed ruins of an ancient underwater civilization. Toya and his friends must venture through the underground complex to find a way back to the surface. As they journey through the labyrinth, they meet two creatures native to the city: the saltwater clown fish, which acts as their guide, and an octopus which impersonates their father. On their arrival in the labyrinth, they realise that their new environment isn't water-tight. During their exploration of the labyrinth, they encounter a girl who seems to be kidnapped by a shark and a dragon turtle, both of which attempt to eat them, but they are stopped by the saltwater clown fish. Afterwards, they meet a group of beings that had previously been missing from the city, whom the clown fish consider to be gods. These beings take a young girl to meet an elder who gives her a gift and rules over the city. After coming to the surface, they free their fellow captives. Then the group suffers from a long period of starvation and dehydration after the elder reveals that the city has been defeated by the Sea of Japan. A white lotus is shown to have grown on top of the elder's head and eventually they all leave the ruins. After finding the photo of the white blob. Toya, and his friend Pops, go exploring on their own. While doing so, they get tangled in seaweed and succumb to the current. Pops is pulled towards the ocean, but manages to get a hold of the seaweed. Toya is carried by the current to a rocky outcrop, where

he finally drops off. There, his lack of experience in diving causes him to break apart an object

Are you ready to take on the challenge? Can you solve the puzzles at each new level? Are you ready to see how much you can get? Fluidity The game was inspired by the natural phenomenon of water, a fluid that is used in real life, having many properties, but is most importantly, is free, dynamic, she is elastic, while maintaining its volume and as if by magic, although not really, everything disappears, everything dissolves and re-appears. This is the fundamental property of water in contrast to other fluids, for example oil, gas, etc. This is the nature of water. And what about us? As we move, we are governed by fluid dynamics. As we need to breathe, we are in fact breathing water. Is water static, stationary? No. It is, of course, flowing, but not really like a river, but more like a meridional movement of water, a great surging movement, without apparent direction and hardly any forward movement. This property makes the emergence of the game interesting and useful in this respect. There is a great difference between these two states of water, the liquid state and the gas state. The gas state is, of course, boiling water. The liquid state is, of course, water flowing. The difference between these two states is inherent in the nature of water. And which is the difference? The gas

state is air bubbles, they are relatively small and free. The liquid state is the great, big, giant water waves, they are relatively free. It is the surface that is different. The surface of the air is the same as the surface of the air. The surface of the water is different. It has a great shape, it has many cavities, it has many different pores. This fluid state is all about the capacity of water to adapt to its environment. It is a phenomenon known as the existence of the liquid-gas transition. But it is a mystery that makes water unique. The one who has immersed himself in the liquid state is a kamikaze, who has experienced the great water wave and the incredible ocean. This is the ocean, has anyone has such an experience? What could be more amazing than this? It is the liquid state. This is the fluid state. Without the transition to the gas state, our lives would be unbearable. How can it be? In the gas state, the air is fixed, all of the time. The liquid state is changing constantly. The liquid
