What the difference between Host and Play Multi-players? 1. In Host Player mode, you set the number of players, and they enter your world.

In Play Multi-players, you simply enter other player's worlds.

The host is the one who starts the game!

The host can see a summary of the number of players, and the same goes for the other players.

In other words, in Play Multi-players, you can more easily experience immersion from new players because you can participate actively on the same platform.
