## Monobooth

\*Monobooth makes it easy to use advanced features such as sound mixing, customizations, add-ins, skins, page turns, etc. to provide a professional booth with full featured features. \*Your booth is completely customizable using premade skins and sounds. \*Turn your booth into an Add-on or Directshow device using nothing but your mac. \*Create multiple and unique booth templates to use with custom skins. \*Create custom sounds and skins based on the add-ins that are installed. \*Use premade skins for the pages, slideshow, and video. \*Page transitions, screen savers, sound mixing, single snapshot and custom fonts are all built in. \*Configure the content of pages, narration, and music from within a simple GUI. \*Skins can be placed inside of groups that allow them to use easy to configure settings such as transitions, screensavers, fonts, etc. \*Whether you're a pro or a DIYer, monobooth is the most feature rich and complete booth application that fits any requirement. The goal of the Photo Booth Creator is to make the process of creating a photo booth as easy as possible. With the Photo Booth Creator, you create a booth without knowing C#, with no programming skills. You'll create an awesome photo booth that is free! Photo Booth Creator Features: Simple to use Photo Booth Builder Interface Drop in all of your custom content MonoBooth Pro has a beautiful layout that keeps everything easy to use. The design makes it easy to add all of your custom content, and you can drag and drop without any problems. This Booth has all the features that make every Booth a success. Make it simple to create a professional Booth using your webcam and Mac with the Photo Booth Creator. Import Photo Booth Builder Templates to quickly build your Photo Booth MonoBooth Pro comes with 10+ pre-made templates that you can use right away, making it even easier to create a photo booth with the Photo Booth Builder! The templates are simple to use and have all the features that will allow you to create a great photo booth in no time. Fully customizable for your needs The pre-made templates allow you to quickly build your Photo Booth, but are not meant for professional production, so they are not customizable by default. You can go into the booth builder and customize the images, fonts, screen savers, and anything else you want to make your Photo Booth the

## What's New In?

- monobooth is a full featured photo booth application with a powerful backend. - booth manager can control the booth remotely - booth manager can remotely and locally control the booth settings - all the booth configuration is done via lua scripts, allowing for almost unlimited configuration - booth themes - booth lock-on - booth scripting - many more features Requirements: monobooth will run on any platform that supports the luarocks package manager and compatible hardware. The framework for this project is built using C++, lua and qml (the front-end build system). Other than this the application is 100% written in qml (Qt/QtQuick). Contents of this project's source code include: - [GRID-LAYER.QML] The main QML UI framework for the user interface - [BUMP.QML] The main QML framework for the interior to background transitions - [CORNER.QML] The main QML framework for the traditional booths' corner transitions - [CONTROL.QML] Controls the back-end logic for this project - [CACHE.QML] User interface controls for caching photos in the booth's cache - [BUMP-LOCATIONS.QML] The lua scripts to handle border-editing and UI transitions - [BUMP-BACKGROUND.QML] The lua scripts to handle back-ground transitions and positions - [BUMP-GRID.QML] The lua scripts to handle animated border transitions and positions - [BUMP-STYLE.QML] The lua scripts to handle animation styles - [BUMP-SHUTTER.QML] The lua scripts to handle animation styles and their positions - [BUMP-FILTERS.QML] The lua scripts to handle animation styles and their positions - [SHAPE-SKETCH-FONT.QML] UI controls to sketch a font from an image - [AVATAR.QML] UI controls to change an avatar and the photo's frame - [PARAMS.QML] User interface controls to edit and save booth configuration - [PHOTOS.QML] User interface controls to view and manage the photo's in the booth - [MANIFEST.QML] User interface controls to manage the booth's virtual folder - [
