“The game balance is very well balanced,” adds Morabito. “We keep the pressure in the game, we don’t spoil the balance of the game with a lot of over-the-top controls.” This year, the Seattle Sounders FC have been included in the game, with the club’s owners and players among FIFA’s 22 Most Valuable Players. The new feature also sees a Seattle player return to the game. Christoph Steinbrech is the most “valuable” Sounders player so far in the game, since he was the top scorer in the past eleven seasons with the club. Steinbrech scored 32 goals and assisted 16 in his time at the Sounders, and has achieved “Gold Status” in the game, which gives players an extra advantage during FIFA 22 gameplay. “In fact, we didn’t just make Steinbrech a gold player, but we made him the most valuable in the entire game,” added Morabito. “A player who can score and assist is worth 20% more than a player who scores only.” For more on the announcement, including behind-the-scenes details on the new tech, visit the game website: [announces new smartwatch Fitbit, the popular maker of fitness trackers and smartwatches](#), is releasing a new companion wrist-device that features an LCD display screen, something the company first tried to do in 2015 with the Ionic smartwatch. The new device, called the Fitbit Versa, is designed to track your health, motivate you to stay active and make fitness tracking and coaching a more personalized experience. Its design is noticeably different than existing devices. Instead of a round display, the new Versa has a square display that’s meant to be more convenient to read in a variety of lighting situations. The Versa also features a heart-rate monitor, a 360-degree camera with Face ID, and sensors that can tell if you have fallen. The Versa will be available for \$199 for the first half of this year. It will be available in black and gray, although the company also plans to offer a special gold version. Fitbit told
