What's New in the DIY Tech Box Password Recovery?

 The next thing you need to do is install the program and add your license key.   Then you can use the ISO disc image that you just created and that contains the bootable program.   Once you are done, you need to create the recovery drive.   This is a simple process that doesn't take long to complete.   Once the recovery drive is created, insert it into a USB port.   Then select the image that you used to create the recovery drive and proceed to boot it.   Once it is booting up, you will need to hit the R button to choose the operating system, there should be two recovery options, the one that you used to create the recovery drive and the one that you are currently using.   Select the one that you want to use and reboot it into the recovery mode.   The next thing that you need to do is click on the option to "Restore the computer to the factory settings."   All you need to do now is reboot the computer back to the previous operating system.   Once it reboots, the password of the Windows 7 account is now forgotten. And by using this program, you don't need to contact your computer vendor or Microsoft for help. DIY Tech Box Password Recovery is a powerful software program that works on all versions of Windows including Windows XP, Vista, Windows 7, Windows 8, Windows 10, Windows Server, etc. In addition, the program works in two different ways, you can choose the default option or the advanced option.
