Updates are, of course, at the heart of the latest Adobe Photoshop. Like the Linux-based operating systems that it sits on, Adobe simply updates the various apps it provides to keep them up to date. This is what updates are designed for: to fix bugs in the program, introduce new features, and sometimes, if there's nothing tangible, to make the programs look prettier. With current updates having been a steady drumbeat of the introduction of new features, however, it's understandable if that is not necessarily the case with the updates made to Lightroom and Photoshop in the past year. The relatively recent updates to Lightroom and Photoshop have been remarkably modest and considered. Both light washes of a new brochure and splash page, some new features in the erosion tool, a few major updates to the Performance panel, and that's about it. With the features tested being relatively plain and uninteresting, the other important aspect to this update is whether the Lightroom and Photoshop apps are any less crash prone or buggy now than they were before the update. My word processing software crashes at least three times a day, which is quite common for me. I can live with a buggy product. If I had a DSSSL or a traditional camera, I'd be lodging a complaint to the manufacturer. With the ability to access Adobe's stock library of images open on the iPad Pro and use pen interactions in Photoshop Sketch, this app could have been a little bit more creative. It's easy to use though. It takes a bit of time to get used to and it's an easily-lost app in the creative world of the iPad Pro. I've seen people leave their iPad Pro devices to stumble about with the light leaky camera hanging out while they're on a shoot, and this app could have come in handy. For someone who leaves their creative iPad Pro around the house, this would be a really neat feature.

Instead of feeling pressured to design a consistent aesthetic across large scale contact pieces, we can let the artistic nature of the typographic content guide the direction and style of the project. Adobe has made significant design changes to get rid of the learning curve for inexperienced users. The filters in the fifth version are very intuitive and easy to use. Along with their Photoshop Lightroom desktop app, Adobe also created their own mobile version of Lightroom called Lightroom mobile. You can find the mobile version of Lightroom in the App Store and Play Store for Android devices, as well as in the device's native photo galleries.
