SurfAnonymous is an easy to use, yet powerful, utility that provides a number of features to help you stay

anonymous online. The program comprises different tools that are all supposed to be used for searching and analyzing proxies, but also for forcing the system's apps to connect to the Internet through a proxy server of your choice. Among the key features of SurfAnonymous are: * Proxy Hunter, for searching proxies * Proxy Analyzer, for analyzing proxies * Proxy Capture, to force your apps to use a proxy server * Proxy Pool, for blacklisting proxies * Proxy Register, to add new proxies * Proxy List and Proxy List Exporter, for adding and exporting proxy lists In addition to the above features, the program is easy to install and use, with no initial setup needed. The "Proxy File Seeder" is needed to install new proxy lists, so the only other requirement is a proxy

server. SurfAnonymous Installer includes an example proxy file that you can use to start downloading the program's proxy lists. The program comprises multiple advanced features, all of which are supposed not only to search for proxies, but also to force installed applications to access the Internet through a user-defined proxy. The so-called "Proxy Hunter" is the

right tool to look for proxies, as the program prompts the user to input the link to a proxy list and let it check them all. The "Proxy Analyzer" on the other hand verifies and displays information on the found proxies, including data such as type, location and IP. What's more, the "Proxy Capture" is the utility that forces all apps on your system to use a proxy server when accessing the Internet, while the "Proxy Pool" blacklists some of the invalid entries. The whole program is quite easy to use, but we've experienced some errors during our testing. First of all, Surf

The whole program is quite easy to use, but

we've experienced some errors during our testing. First of all, SurfAnonymous doesn't always manage to retrieve proxies from the lists you input, so you may have to try several pages before finding one that really works. Secondly, the application doesn't work on Windows 7 at all, as it fails to launch even when used with administrator privileges. All things considered, SurfAnonymous is a decent program, but it clearly needs improvements to allow users benefit from all its features with ease. It's a stable app, that's true, but some of its tools are working the way they should.
