Screenshots Customer Reviews What a shame! by cdfurton This is a very gorgeous game. The combination of plants, colors, and music is flawless. However, the game is absolutely unplayable due to its chronic tendency to crash every time you run it. This problem doesn't seem to be isolated to certain devices (even I have bad luck), and hasn't gotten any better since the last update. It's a shame because this game is gorgeous, has great potential, and has good gameplay. If only there was a fix that would help it become playable. Please fix it. Lovely, lovely game! by Todinho I just finished it today. It's enjoyable and cute. Thanks! Amazing by Cacaofaeru What can I say? This is a very fun game. The music, the animations, the controls are all great. And playing the game helps you grow plants. I can

Walking through the streets and highways of the future or even the past, walk the road of a stalker. Your job is not a simple one: to kill rival stalkers and destroy those who oppose you. The game uses the Unreal Engine, which is used by a large number of great games and is optimized to deliver stunning graphic effects in the game. Key features include: - A unique universe - A massive open world - Manipulate the environment using the power of artifacts - Space battles - Flying cars - New items that change the game - Various challenges and game modes - Quests - A lot of fighting action In the world of a galaxy, where the great power of space and race launches into new challenges and puts new medals to the ship. Robots on Earth, quickly and completely divided into companies, are the only hope for the world. The future is an unknown territory, and an inexperienced group of young and talented scientists is about to prove themselves. Your task is to help these scientists and their robot, destroyed by competitors, create a powerful prototype that would be the main competitors and conquer the universe. SpaceBalloon is the first physics sandbox game for VR where you play through a number of space missions. The game is a combination of "first-person puzzle" and racing elements, allowing you to create your own futuristic spaceship. Meet Arty and his robot, a unique flying vehicle that can change the direction easily and choose between two modes of transportation - vertical and horizontal. You can travel through the environment as freely as you want, and the gravity and inertia of the environment can be changed on the fly. The game features an open-world environment for a virtual reality. The game allows you to enjoy the realistic physics of a space environment with a wide range of objects, with changes that alter the game difficulty as well as the scale and behavior of the objects. The game contains a huge number of detailed elements, such as blocks, mountains and houses, which can be used as a building blocks. The game also includes a variety of weapons, gadgets and powerups that will help you in your missions. The game will take place in a space station which can be divided into six levels or missions. Each level will have a new mission to accomplish - you can only do what the mission tells you to do. To complete the mission, you'll need to: collect, process and sell resources to produce useful things. The goal of the game will c9d1549cdd

The player explores old Fort Oasis as a protagonist of secret experiments. During his adventures, the player can find numerous caches of weapons, ammunition, and other tools. The game features a fighting system that allows the player to equip himself and his allies with various items in the game world. To equip items, the player uses a 'magic item' interface called the "Chart of the Soul" that can be accessed from within the "card UI" menu. The player can develop his character through a system of attribute points which must be expended to improve attributes such as Strength, Speed, Dexterity, Vitality, Cunning, Mettle and Perception. Vectrix is a sci-fi-noir indie side-scrolling shooter that has you battling against a an ever-evolving cellular automata. You play as an android named Kenji-class with a unique ability called SYNth. This power allows you to string together cells to create shapes, such as suns, planets, fissures and vortexes. If you can connect all the shapes, you can destroy the cells that are beneath them! The gameplay of Vectrix has an endless difficulty curve. Only the addition of new cells can reduce your chances of survival. The combination of basic cells and these new cells are randomly generated during gameplay. Pairing cells can create a cross-shot, tri-shot, and T-shot, which can be activated by holding the left analog stick in the direction of the shot, or pressing triangle, square, and X. Multiplayer matches are still in development. Check our Discord for updates and suggestions! Based on John Conway's "Game of Life" cellular automaton, Vectrix is a techno dual-stick shooter that harkens back to arcade cabinets and pockets full of quarters. Face a nearly unlimited difficulty curve as you blast away at chaotic and erratic cells whose behavior is mathematically unpredictable in most cases! Blasting cells causes others to wilt away if you're lucky, but can also cause massive explosions of new cells! Feel the upbeat rhythm energize you as you connect the shapes to unlock cross-shots, tri-shots and T-shots at enemies! Beware of new cell formations as the colors get hotter and the music gets more intense! Race to the top of the leaderboard and beat developer high scores. Challenge your friends! Are you the best cell eradicator in town? Leave your initials to prove it!Features: Dual-stick shooting Smash developer high scores on the leaderboard! Collect powerups for even better blasting power! Funky techno-synthwave soundtrack Predictable basic cell formations evolve into uncontrollable coagulations! Solve open questions about cellular automata? Color-changing, music crescendoing difficulty curve Challenge friends and family to trounce your massive high scores Revel in the beauty of particle effects Accidentally die while reveling in the beauty of particle effects Blast unpredictable cells out of this world!About Development This game was developed as a student project at DigiPen Institute of Technology and was created for educational
