I need OKR8 to make a usb recovery key. I have Windows 8.1 on the laptop.Q: How to extract the text box contents of a dynamically generated form I am trying to make a PHP function to extract the values from a dynamically generated form on a search engine. The form is generated as one large table. My current table setup is: Make: In the search engine php file I am currently using the following code: if (!empty(\$_GET['make'])) { \$make = \$_GET['make']; } else { \$make = ""; } This will still take the form, but the value will be an empty string, and I would like the value to be the textbox that I typed into the form. Can someone help me with this? A: \$_GET is an array. If you want to get the value of an input check this code. "/> If you wanted to get the values of all the input in the form you could use a while loop or 3e33713323
