PC VERSION! ESO PLUS. playing soccer is a simple game. PES 2010 - SMOKE Patch 2.2 pc gameQ: Average of rows in mysql I have a mysql table with the following structure: I am trying to get the average scores. I have tried the following query: SELECT AVG(score) FROM table; When I ran it, the output was as expected for all the row but for only one row the output is different: I have tried running the following query: SELECT AVG(score) FROM table WHERE id = 1; When I ran this, I received the average scores for all the rows as I expected. Is there a way I can get the output for only the row having an id of 1? A: You can use GROUP BY together with a HAVING clause. This will only work if you mean each score within a id. You also don't need a WHERE clause on a HAVING statement as it would be implicit. Try: SELECT AVG(score) AS avg, id FROM table GROUP BY id HAVING avg > 3; You could then get the row where the AVG is greater than 3 (or any number) with: SELECT * FROM table WHERE avg > 3; /* * Copyright 2014 Red Hat Inc. * * Permission is hereby granted, free of charge, to any person obtaining a * copy of this software and associated documentation files (the "Software"), * to deal in the Software without restriction, including without limitation * the rights to use, copy, modify, merge, publish, distribute, sublicense, * and/or sell copies of the Software, and to permit persons to whom the * Software is furnished to do so, subject to the following conditions: * * The above copyright notice and this permission notice shall be included in * all copies or substantial portions of the Software. * * THE SOFTWARE IS
