this one allows you to access it when you have access to the website, but if you've only got a couple of dollars on your credit card you'll need to go to the google store or the gameup if you want to play without paying. dark hero party has a bit of a reputation of a meme game that gets recommended to emotionally traumatize newcomers with no experience in the genre and i really dont think it deserves that reputation. part of it seems to be due to the fact that most people ragequit early in the game before the deconstructive segments appear, which leads them to believe its simply just one of the many of its kind, but i suppose thats the fate that all deconstructive works that dont immediately play their hand will have to live with. there are many aspects of how this game constructed itself that really impressed me and i think its a lot more subtle, perhaps even philosophical, than most of the interwebs gives it credit for. im curious to play this now. i want to know your opinion on these types of games (i mean doujin ero games), and also on dark/depressing narratives. do you actually enjoy them and do you think. in the case of this game, is it necessary for the protagonist to have a payback moment or the opportunity to find a succesful/satisfying ending for himself im usually put of by these type of stories because i dont like the idea of taking everything away from a character just to send a message about real life. if happiness cannot be achieved after suffering despair, maybe chaos can come to spice things up. dark hero party has a bit of a reputation of a meme game that gets recommended to emotionally traumatize newcomers with no experience in the genre and i really dont think it deserves that reputation. part of it seems to be due to the fact that most people ragequit early in the game before the deconstructive segments appear, which leads them to believe its simply just one of the many of its kind, but i suppose thats the fate that all deconstructive works that dont immediately play their hand will have to live with. there are many aspects of how this game constructed itself that really impressed me and i think its a lot more subtle, perhaps even philosophical, than most of the interwebs gives it credit for.
