This game is pretty interesting. It features a very rich fantasy setting, plus a multilayer story game system, a degree of depth. Overall, with about a week, it's worth it to play! On the plus side, the setting and story are amazing! From the start, it captures the era of legends of the battle between Nerull and Elden. However, because it's a very sparse title, I'm not quite sure I'd recommend it. But for those who love the setting and are curious, it's well worth checking out. It's got a very flashy look! It's also has a very cool siggraph-esque 3D environment map that you can explore. Game looks cool but the length of the story system makes it hard to get into. I was trying to pick it up for a month but gave up and spent \$15 to join a gaming group instead. Rivals is like a futuristic MechAssault but this time, it's real-time and has a cinematic twist. In Rivals, you play as a member of the Sentries, an elite team of supersoldiers who are on a mission to uncover the truth behind the mysterious Ruin world. Pros: - People like mechs. - This is like MechAssault, but for real! - The story is interesting and it ends up good. - Hand-to-hand combat! - The enemy team is good. Cons: - There's a lot of customization, which makes this game very difficult to pick up. - At first, it feels slow, but then you find yourself wanting to play it all the time because it's a fun game. - The story is a little bit predictable at first, but then the twist is very interesting, even if it's a bit predictable at first. Verdict: Amazing game. If you like MechAssault, then this is a great game to check out. Read Full Review VERY BRILLIANT STORYLINE You play as one of the Sentries, a group of mercenaries that is part of a special unit comprised of sentinels that serve the Gods, take part in missions like the ones taken by the Triton Warrior class. Pros: - There are no disadvantages to play this game. - There are special
