Faces

Faces is a unique powerful synthesis of VR and real time strategy. During the battle, if a character uses a special skill, the party and your opponent perform an action together with the avatar. For example, when targeting the enemy with arrows, the enemy gives the characters an attack feedback. In VR, this action is made visible to the players, and you can enjoy the show with the ears in game. (In development version) All players can perform the game together according to the characteristics of the event, and it's possible that cooperating with the avatar in the game will make players feel welcome.
