click the downloadbutton belowand you should be redirected to download website. wait 5 seconds and click on the blue download now button. now let the download begin and wait for it to finish. once the bureau: xcom declassified is done downloading, right click the.zip file and click on extract to the.bureau.xcom.declassified.zip (to do this you must have winrar, which you can gethere). double click inside the the bureau: xcom declassified folder and run the exe application. have fun and play!make sure to run the game as administratorandif you get any missing dll errors, look for a redistrib or _commonredist folder and install all the programs in the folder. at first, the game has a bit of a slow beginning - you have to finish your first mission, and in order to do so you have to find your way around the xcom's base and remember all the important locations, so be patient. but once you succeed at that, you can start doing many other tasks - such as saving money to construct new buildings, hire more soldiers and improve your soldiers' skills. there is also a mission generator in the beginning of the game, which you can use to generate missions and see what kind of missions you can find. the graphics are top-notch, and the soundtrack is great as well. the in-game cutscenes are pretty well done, as well as the environments - they're very detailed and look quite amazing. on the other hand, there are some things that i don't like - the game is very easy, and it's more of a game to pass the time than an actual game. the gameplay is kind of similar to xcom: enemy unknown - you have a good amount of options in this game, such as map configuration, radar, weather, tactical mode and so on. every decision has an effect on the game, and you have to make sure you use all of the options that are in the game. 5ec8ef588b
