Check out all the new features: DYNAMIC TARGETING The new Dynamic Targeting System makes you even better at defending with crowd-pleasing AI tactics, which come to life in many new ways in FIFA 2K19. The new Dynamic Targeting System uses millions of player actions to create more realistic ball behavior. This system is able to interpret player actions like tackles, shots and long passes, and will decide which of them are allowed by the system's core philosophies. "I think players will really enjoy how important tactical decisions feel when it comes to defending," said Will Pomeroy, senior producer of FIFA. "The tight marking that occurs when you block a throw-in or make a sliding tackle are really tactile and natural, but are very rare in video games. We're excited to see that as more of a defining factor on the pitch. "
