Q: What is the use of "select all" button in mail I am seeing the "select all" button in gmail. what is its purpose? I guess it will be used by user to select all the mail id to be moved to another mail id. I have the following questions: Which process is used to use this button? What happens when user clicks this button? Is there any difference between these two? A: select all is the 'De-Select All' feature of GMail. There are two ways to select items. You can select single items (items that are highlighted, in red, blue or green color) using mouse or touch screen or You can select them all (all items, highlighted in red, blue or green color) using the select all button. As per my experiments, Gmail users are unaware of the second option. Most of them are unaware of 'Select All' option. Hence, they click the 'Select All' button, selecting all the items and accidentally delete them, by mistake. 1. Field of the Invention The present invention relates to an

You can annotate objects, change object properties, and change the properties of the objects and their annotations. Visible Lines: Add, move, and transform invisible lines to help you work faster and more efficiently. Open the Visible Lines palette (View > Palettes > Visible Lines), select a type of line, and choose a color from the dialog box. You can also choose to display any other line you have drawn to indicate invisible line objects. Visible Fill: Add fills to indicate hidden lines and edges. Open the Visible Fill palette (View > Palettes > Visible Fill), select a type of line or fill, and choose a color from the dialog box. You can toggle on and off the Flood Fill feature, which automatically floods hidden lines with the current color, making them visible.
