Register a free account to unlock additional features at BleepingComputer.com Welcome to BleepingComputer, a free community where people like yourself come together to discuss and learn how to use their computers. Using the site is easy and fun. As a guest, you can browse and view the various discussions in the forums, but can not create a new topic or reply to an existing one unless you are logged in. Other benefits of registering an account are subscribing to topics and forums, creating a blog, and having no ads shown anywhere on the site. BC AdBot (Login to Remove) Hello, As you will see from the title this is a problem others have with XP. I have the same problem and have taken these steps so hopefully you can see how to fix the problem. Please read my other posts in this forum: I have searched for many days to find a fix to my problem but have not found anything that will work. I am a real novice with computers so be kind to me. I don't know if you mentioned this in any of the other posts you have read but, after the first reboot my computer would give the blue screen, the screen would go
