I'm neutral to the Joey voice, but I really don't like the sound of the Justin. The user can integrate this with many other platforms Like Mozilla, Chrome, etc. torrent IVONA Voices 2. Free american english speaking ebooks: pdf word ereader. Learn english as a second language. Free download book 2. Best selling book.Q: how to print a vector of strings? I have a vector of strings called: string send_message[num_users]; that has a bunch of strings, currently I'm just making sure that each one is less than 15 characters long (longer and it won't send) how do I print them out? A: Assuming that your vector is declared like this: std::vector send_message; You can print them with cout: for(std::string s : send_message){ cout Q: Properly escape strings in Informatica I'm trying to map JSON data from a file to an ADP, and I have a problem with the string encoding. I have a column containing the following strings: xyz xyz-abc.js xyz.jpg xyz-abc.png The mapping step goes fine, no problem, but when the transformation step is applied and my source file gets refreshed, I see some rubbish characters instead of the actual strings. Is there any way to tell Informatica to escape the strings according to
