If you're looking to purchase a MacBook to take full advantage of Apple's ecosystem, there are a few existing models that provide incredible performance for the same price as a MacBook Air. While it's fun to think about the features of a new Apple product, the question you have to ask yourself is: what kind of power do I need? Some of the best MacBook alternatives are built with specs like more than 8GB of RAM, an SSD, and discrete graphics. After I have reviewed the new features for Lightroom 5, I will continue with my series of Lightroom updates, and talk about the implementation of these new features, their benefits and drawbacks, and give my pros and cons.
